

# WEB PLATFORM

## CORPORATION

WEBAGM offers the opportunity to involve shareholders on a broader basis, both from a geographical angle, the need to travel in general and the relevant time window around the AGM date.

The WEBAGM platform allows for a significant enhancement of Due Diligence of your entire corporate AGM administration process.

Relevant shareholder questions can be registered in advance and the AGM Q&A session can run more effectively.

## REGISTRAR

The close relationship between the Corporation and its Registrar will be utilised by WEBAGM to verify shareholders electronically via API.

## SHAREHOLDER

WEBAGM sets a new standard for shareholder participation in corporate AGMs. You are no longer limited to your physical presence at a possibly inconvenient venue at a set time.

Shareholders can review all relevant AGM documents days prior to the actual event and subsequently register questions and vote for the resolutions provided. All of that from the comfort of their own home or office and at their convenience within a given time window prior and during the AGM.

## EVENT WEBCAST

The AGM will be recorded and broadcast live and/or post event on the WEBAGM platform.

# WEBAGM.COM

# LIVE EVENT

A successful AGM is the result of many different specialist contractors working seamlessly together in the run-up and on the day of the event.

WEBAGM acknowledge this fact by providing an integrated event management platform to allow coordination between all the specialist suppliers to the event, both online and on-site.

From webcast companies to security, from graphics suppliers to stage build, everything is in one place.

## AGENCY

The live AGM event will happen to varying degrees depending on the priorities set by the Corporation.

## LIVE EVENT

## REGISTRAR

Present at live event for registration / voting if required.

Specialist contractors can always run their on-site schedule in real time. They can manage their own staff with their dedicated login.

On WEBAGM, each event has its own digital storage space, allowing effective management of relevant documents such as layout drawings or the latest backdrop graphics. Everyone always has access to the latest version.

Contractors can also advertise their availability to other organisers.
